

CLUTCHES **GRIP**

Black version is available on request (**/B** after the code)

Mod. 507.111

	MODEL	Ø LINE mm	TYPE	WIDTH mm	WEIGHT kg	SCREWS N° x Ø mm
	507.111	8-10-12	SINGLE	34	0.40	2 x Ø6
	507.121		DOUBLE	67	0.80	4 x Ø6
	507.131		TRIPLE	101	1.20	6 x Ø6
	507.112	10-12-14	SINGLE	34	0.40	2 x Ø8
	507.122		DOUBLE	67	0.80	4 x Ø8
	507.132		TRIPLE	101	1.20	6 x Ø8
	507.113	12-14-16	SINGLE	34	0.40	2 x Ø8

The new "V-Grip" Stopper is designed to provide high holding power with no line slippage while allowing the line be released under maximum load without the use of a winch. The line can also be tailed through the stopper without opening the cam mechanism. The stopper's holding strength is increased by providing a longer and "V" shaped cam mechanism that increases the bearing surface on the line. This design also reduces line cover damage and the crushing of composite lines such as Kevlar, Vectran and Spectra. The stopper is also excellent for standard Polyester braids. The inner structure is made of 316 stainless steel making it strong enough for the most demanding

conditions. A compact size (only 6,6 cm in height) makes the stopper easy to install anywhere on the boat. The same model is made in 3 different versions for lines from 8 to 16 mm.
